<b>Electrical installation</b> .....	56
cable hanger type HDO .....	56
cable hanger type HDS .....	57
cable hanger type HDO for aluminium area.....	58
flat bar type HFS 30 .....	59
flat bar type HFS 50 .....	60
flat bar type HFSg open .....	61
flat bar type HFSg closed.....	62
electro ground plate type HNA .....	63

electro ground plate on customer requirement .....	64
<b>welding guns</b> .....	65
welding gun type SK14 ISO .....	65
welding gun type K22 .....	66
welding gun type K22 D .....	67
welding gun type K22 ALU .....	68
<b>Wear parts</b> .....	69
Tool set for stud welding gun SK12/SK14/SK14 ISO to weld threaded studs M6 up to a length of 100mm .....	69
Tool set for stud welding gun SK12/SK14/SK14 ISO to weld threaded studs M8 up to a length of 100mm for type RD, FD und PD .....	70
Tool set for stud welding gun SK12/SK14/SK14 ISO to weld type UD 8mm .....	71
Tool set for stud welding gun SK12/SK14/SK14 ISO to weld bimetal pin VBS or insulation pin IS $\varnothing$ 3mm .....	72
Tool set for stud welding gun SK12/SK14/SK14 ISO to weld 3mm insulation pin .....	73
Tool set for stud welding gun SK12/SK14/SK14 ISO to weld studs type PS without shield gas .....	74
Tool set for stud welding gun SK12/SK14/SK14 ISO to weld with shield gas .....	75
Tool set for stud welding gun K22 to weld anti-skid studs type AS .....	76
Tool set for stud welding gun K22 to weld 3mm insulation pins .....	77
Tool set for stud welding gun K22 to weld VBS and IS 3mm (without shield gas) .....	78
Tool set for stud welding gun K24 to weld threaded studs M20 on to manhole rings .....	79
Tool set for stud welding gun K22/K22-D to weld studs M12 type RD (DIN32500 T6) and type MD up to length L=100mm .....	80
Tool set for stud welding gun K22 to weld flat bar type HFS und ground plate type HNA with studs $\varnothing$ 10x40 up to $\varnothing$ 10x80 .....	81
Tool set for stud welding gun K22 to weld flat bar type HFS und ground plate type HNA with studs $\varnothing$ 10x100 up to $\varnothing$ 10x120 .....	82
Tool set for stud welding gun K22 to weld elbow-threaded studs type WB8 .....	83
Tool set for stud welding gun K22/K22D to weld cable hanger type HDO/HDS up to length l =150mm .....	84
Tool set for stud welding gun K22/K24/K22 to weld using shield gas .....	85
Tool set for stud welding gun K22/K22D to weld threaded studs M6 DIN 13918 up to length L=100 mm .....	86
Tool set for stud welding gun K22/K22D to weld threaded studs M8 DIN 13918 up to length L=100 mm .....	87
Tool set for stud welding gun K22/K22D to weld threaded studs M10 DIN 13918 up to length L=100 mm .....	88

Tool set for stud welding gun K22/K22D to weld threaded studs M12 DIN 13918 up to length L=100 mm.....	89
Tool set for stud welding gun K22/K24/K22-D to weld studs type SD and type KBMI (head $\varnothing$ =20mm weld $\varnothing$ =10mm).....	90
Tool set for stud welding gun K22 for studs type KBMI reduced.....	92
Tool set for stud welding gun K22/K24/K22-D to weld studs type KBMI (Head $\varnothing$ =20mm; weld $\varnothing$ =10mm).....	93
Tool set for stud welding gun K22 with 3-point-support to weld studs type SD10 as of length L=50mm.....	94
Tool set for stud welding gun K22 Alu to weld flat bar type HFS using shield gas.....	95
Tool set for stud welding gun K22 Alu to weld cable Hanger open type HDO using shield gas.....	96
Chuck for threaded studs .....	97
Chuck for insulation pins .....	98
Chuck long .....	99
Chuck for studs type SD and KBMI .....	100
Ferrule grip as footplate.....	101
Ferrule grip.....	102

## Technical info

Our welding studs are made from materials suitable for stud welding. Dimensions and design of our standard products conform to EN ISO 13918; any non-standard products supplied will be produced to correspond to the norm. If you wish to us a type of stud other than those listed, please send us your enquiry and consult our specialists about your welding task.

Welding studs are available in different materials. Upon request the properties of each can be documented by test report 2.2. or inspection certificate 3.1 or 3.2 (EN 10204)

### Non-alloy structural steel:

Non-alloy structural steel welding studs are manufactured from S235 according to EN 10025:2005 with more stringent requirements for carbon content, degree of purity, grain size and surface properties. This makes the material ideally suited for stud welding.

For threaded studs, pins, tapped studs and similar products, we guarantee mechanical properties according to EN ISO 898-1, property class 4.8.

We supply shear connectors of our partner Köco, manufactured from S235J2+C470 or S355 according to EN 10025:2005 with the following mechanical properties:

Tensile strength $R_m$	$\geq 470N/mm^2$
Tensile strength $R_m S355$	$\geq 510N/mm^2$
Yield strength $R_{el}$	$\geq 375N/mm^2$
Elongation $A_5$	$\geq 14\%$

Shear connectors exceed the requirements of EN ISO 13918. The CE-conformity with the European Technical Approval ETA-03/0039 dated May 31, 2010 by Deutsches Institut für Bautechnik (DIBt German Institute for Building

Engineering)) has been demonstrated

### Stainless steel:

We supply threaded studs, pins, tapped studs and similar products made from A2-50 according to DIN EN ISO 3506-1.

Welding studs made from stainless and acid-resistant steels such as 1.4541, 1.4571, 1.4401, 1.4404 in various property classes are available upon request. We supply Köco stainless steel shear connectors made of 1.4301 in accordance with EN 10088:2005 with the following mechanical properties:

Tensile strength $R_m$	540-780N/mm <sup>2</sup>
Yield point $R_{p0,2}$	$\geq 350N/mm^2$

The CE-conformity with the European Technical Approval ETA-03/0039 dated May 31, 2010 by Deutsches Institut für Bautechnik (DIBt, German Institute for Building Engineering has been demonstrated

Heat- and scale-resistant welding studs are manufactured from 1.4713, 1.4742, 1.4762, 1.4828, 1.4841, 2.4851 or 2.4856, Other materials are available upon request.

### Stud dimensions:

Generally, the nominal length is the length of the stud "after welding". The studs delivered are 1 to 5mm longer than their specified nominal length (except KKS boiler tube studs and KHS concave pins). This enables the welding parameters to be checked by measuring the stud length after welding.

### Threads:

The threads of studs are cold rolled and manufactured in

accordance with DIN 13-20, tolerance 6g; non-standard threads are available upon request.

### Flux:

Studs for welding with ceramic ferrules are provided with an aluminium tip as required by the welding process, to facilitate the ignition of the arc, to stabilize the arc, and to deoxidize the welding pool. The correct amount of flux used is an essential factor in obtaining perfect welding results.

### Surface protection:

Unless specified otherwise, welding studs are delivered uncoated.

Non-alloy structur steel	4.8
Stainless steel	A2-50
Stainless steel	A4-70
Heat resistant steel	1.4828

Zinc-plated	4.8 A2K
Copper-plated	4.8 C2E
Nickel-plated on copper base	4.8 G2E
Zinc-flake coating	4.8 zl
Aluminium	AlMg

In the case of zinc-plated studs, the zinc coating is removed at the welding tip to prevent contamination of the welding pool.

### Ceramic ferrules

The ceramic ferrules can be used only once. The ferrules required for welding are generally included in the delivery of the studs. Ceramic ferrules are not available without studs.

### Weld collar:

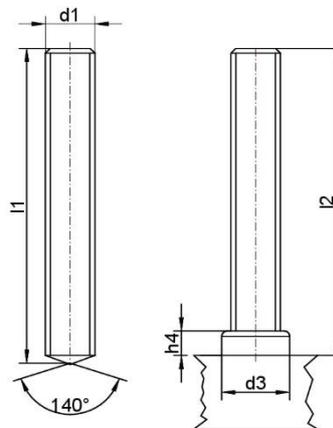

In the course of stud welding a weld collar is formed where the stud is joined to the work-piece, its dimensions depend on the welding parameters as well as the ceramic ferrule used. In this area threads, for example, cannot be utilized.

deck plate fairing (steel area)

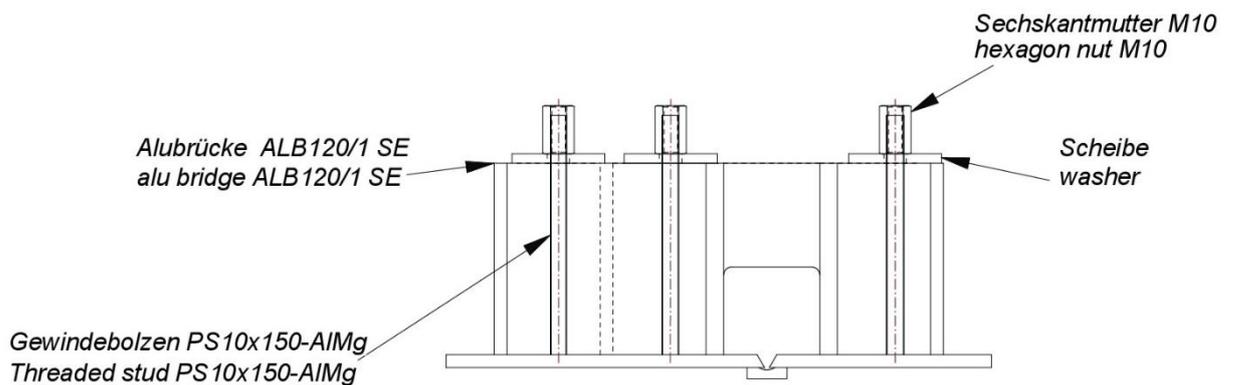

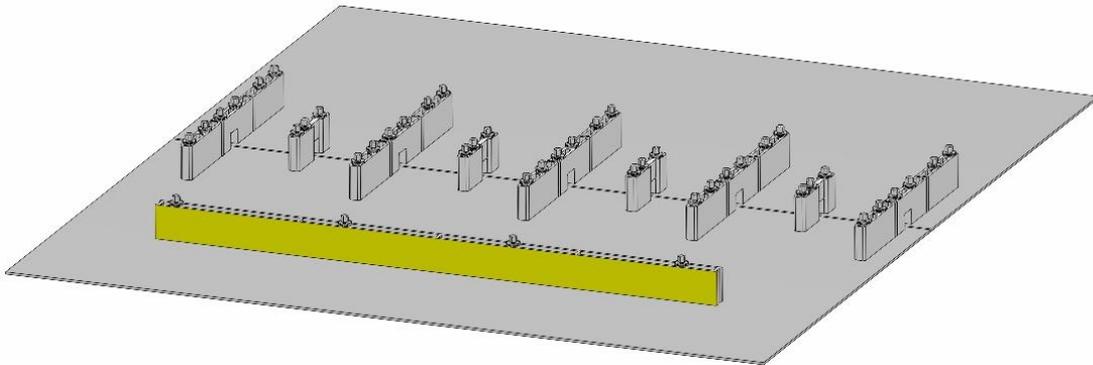

Advantages:

- safe alignment of the assembly joints
- easy installation by stud welding
- easy overhead installation
- saving of auxiliary materials
- safe system through stud welding
- energy saving
- quick dismantling

scope of application	tensile nut
steel < 7 mm	M10
steel 7 bis 15mm	M12
steel > 15mm	M16

## deck plate fairing (aluminium area)
